

## RE room thermostat

KK RE 03.13 EN

### DIMENSIONS

### GENERAL CHARACTERISTICS

RE Room thermostat is wired temperature controller for heating and air conditioning systems.

### TECHNICAL DATA

Temperature range setting	+5...+45°C
Operation temperature range	-10...+50°C
Protection class	IP20
Switch capacity - inductive	3,5 A
Switch capacity - resistive	16 A
Power source	2x1,5V AA battery
Mounting type	Surface

### SPECIAL FEATURES

- 4-zone weekly programmer;
- connection of external temperature sensor possible;
- anti-freeze protection;
- editable hysteresis;
- PI – heating curve optimization system;
- measured temperature correction.
